

5 HALLMARKS OF AGILE WORKSPACE

AGILITY is defined as the ability to think and move quickly, to reassess and adapt to changing requirements and circumstances.

AGILE WORKING - encompassing business travel and flexible working through to 'hot-desking' and 'untethering' from fixed workspaces altogether - represents a mindset shift in how we work, where we work and when we work.

As the agile workforce is expected to reach nearly 50% by 2020, agile and mobile workers will need workspaces that can support them to thrive, wherever they find themselves working.

Our partner 'AGILE WORKSPACES' are designed, built and assessed with individual and team productivity in mind.

BE PRODUCTIVE, BE WELL, BE CONNECTED, IN A HARBOUR84 AGILE WORKSPACE
